4. BUSINESS

4.1 Results Based Budgeting

The ADM, Financial Sector Regulation and Policy Division, advised the Board of information he had shared at the SCG Meeting on March 11, 2013. He had told the Employee group that he met with, that the work the LAPP Board is doing is a micro part of a macro process. He advised that ATBF is looking at the work that is being done by LAPP on sustainability within a broader context of the other three public sector plans, the Results Based Budgeting process, the Auditor's process and within the context of pension changes across the country. He told the Board that the current Minister is interested in hearing input on governance.

S. Gould joined the meeting at 8:20 a.m.

There was discussion on how solutions should not be one size fits all, how one plan change may affect other plans, as well as how LAPP is much larger than the other Public Sector Plans.

D. Sieben joined the meeting at 8:30 a.m.

The ADM, Financial Sector Regulation and Policy Division, updated the Board on Results Based Budgeting (RBB) and the review of LAPP Corp. He advised the Board that a review of LAPP Corp. is unavoidable due to RBB Legislation. The expectation is that the RBB process will answer the following questions: Is the program/service delivered in the most efficient manner and is the program/service operating efficiently?

There was discussion on the definition of efficiency, the cost for the review, the previous role of Board Secretariats, the sophisticated support the LAPP Board currently receives, benchmarking with other plans, how the RBB review will take place, the Mandate and Roles timeline and Employer Withdrawal responsibility.

The Chair advised that he and the Vice Chair would be meeting with an ATBF representative on Tuesday March 19, 2013, regarding results based budgeting. Key messages for the meeting were included in the report.

There was discussion about the operating cost of LAPP Corp, service and cost issues if LAPP Corp's services were centralized with other Board's support services, that there needs to be more details in the key messages, and how the RBB will get information/feedback from the stakeholder group.
